This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

RISK AND REWARD PROFILE

The Risk and Reward Indicator is a simple measure of the risk associated with investing in the Fund. The higher the rank, the greater the potential reward, but the greater the risk of losing money.

For periods prior to the Fund’s launch where there is no performance history, the indicator is based on the Fund’s Benchmark. Historical data, such as the data used in calculating this indicator may not be a reliable indicator of the future risk profile of the Fund.

The risk and reward category may shift over time and is not a target or a guarantee. The lowest category (i.e. category 1) does not mean a risk-free investment.

Fund is in category 5 because of the medium to high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The fundamental risk associated with any stock portfolio is the permanent loss of capital. Stock values may fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions.

The Fund’s holdings usually differ meaningfully from the Benchmark and will often be relatively concentrated in some industries, while at the same time having little or no exposure to others. This means that events causing a decline in the value of holdings in industries in which the Fund is invested may have a significant effect on the Fund’s value and its performance may differ significantly from the Benchmark.

Similarly the Fund holds a smaller number of different stocks than many other funds meaning that performance of a single stock within the portfolio may have a greater effect on Fund’s value.

The Fund offers no capital guarantee or protection.

More information in relation to risks in general may be found in the “Risk Factors” section of the prospectus.
